Item: F.2.

To: Honorable Chairman and Trustees, Glenpool Utility Service Authority
From: Sarah Griffin, Public Works Project Manager
Meeting Date: October 6, 2025
Department/Office: Public Works
Item Name: Discussion and possible action to approve a quote for the purchase of a jet rod trailer from Improved Construction Methods (ICM) in the amount of $92,185.00.

Summary:
A jet rod trailer is a critical piece of equipment used to clear blockages within the City's sanitary sewer system. The City's current trailer has reached the end of its service life, with ongoing maintenance difficulties, limited parts availability, and frequent service issues. Due to its condition, the unit is no longer reliable, and staff determined replacement is necessary to ensure continued sewer system functionality.

Staff obtained multiple quotes for comparable equipment packages:

1. Improved Construction Methods (ICM): $92,185.00
    1. Kubota diesel engine, 74HP
    2. 3,000 PSI @ 35 GPM
    3. Includes additional features selected by staff, with flexibility to adjust options if needed
    4. Strong serviceability and local support available

2. Key Equipment: $95,237.50
    1. Kubota diesel engine, 74HP
    2. 2,500 PSI @ 40 GPM
    3. Equipped with useful features and service support, higher costs and recent staff turnover raise concerns about reliability of representation.

It should be noted that staff looked at another quote from USA Blue Book, but it did not meet specifications and there were no other local options for this piece of equipment. After review, staff determined the ICM trailer is the best option due to its higher-pressure capacity, broader features, and strong service support. The ICM unit offers superior functionality and long-term maintainability, which is critical for operations.

This purchase was included in the approved FY25–26 budget, with $100,000 allocated for this equipment.

Recommended Action:
Staff recommends approving the purchase of a jet rod trailer from Improved Construction

Methods (ICM) in the amount of $92,185.00 from the 02-6-16-6333 Capitol Purchases fund.

Electronic funds transfer ("EFT") fraud is on the rise. If you receive an email or other message containing EFT transfer instructions on this project, regardless of the purported sender, it is very likely an attempted scam. **Do not follow the instructions and do not respond to the email.** Examples of email scams include messages that appear to be from someone at Crossland Heavy Contractors but are not. For example, the email may be from "heavy_contractors.com" or "heavyc0ntractors.com" rather than "heavycontractors.com". If you have any questions about any email or other message you have received concerning payments on this project, please call our office headquarters in Columbus Kansas and ask to speak directly with Matt Kitchen, Treasury Manager - Office phone: 620-429-1414/Cell: 620-210-2038, or Holly Rhodes, Controller - Cell: 620-762-0928.

Please also advise all of your employees or agents who are or may in the future be involved in making payments on this project of this warning. Any one person on your team who is not aware of this danger could cause payments to be transferred to a scammer. Attn: Jason Smith

Ref: Pratt Valves / Glenpool WWTP

Dear Mr. Smith,

Mueller / Pratt has been producing and supplying valves for the water / wastewater industry for American Iron and Steel Act projects since its inception. Various Pratt Valves are exempt from AIS due to material content of the iron and steel being less than 50% of the product makeup. This allows Pratt to be in conformance with the requirements of the project specifications. The below guideline by the EPA outlines the acceptance of this exemption.

American Iron and Steel Requirements for State Revolving Funds

This link takes you to training slides provided by the EPA. Specifically, page 29 and 30 explains if this is not an iron and steel product, then it does not need to meet AIS Requirements. This is the scenario for the valves on the above referenced project.

Please also see the attached Conformance letter from Pratt listing the specific valves being supplied for the Glenpool project.

Sincerely,

Gregory Dill

Is the product "Primarily" Iron or Steel?

- Products greater than 50% iron or steel, measured by material costs only (not labor, overhead, shipping, etc.)
- How do I calculate material cost?
  - Fire hydrant example:
  - Typical iron/steel components – bonnet, body and shoe
  - Other non-iron/steel material costs – stem, coupling, valve, seals, etc
  - Assembly of the internal workings into the hydrant body would not be included in cost calculation

What is an Iron and Steel Product Under the AIS Requirement?
